

YOUR EYEBROW AFTERCARE KIT CONTAINS THE FOLLOWING:

A & D Ointment

- Your eyebrows may feel tight, swollen, and/or dry for up to a week following your procedure. Keep the brow area clean by washing lightly with a neutral soap and patting dry. Water alone is fine too. Use a sterile wipe to maintain cleanliness if desired. After cleaning apply a thin layer of A&D ointment over your brows to keep them moisturized and to promote healing for (approx. 1 week). Do not rub or pick at your eyebrows while they are healing as loss of color and/or infection could occur. It is important that your brows "flake off" on their own. If necessary, the application of ice is recommended to reduce swelling.
- Showering/baths will not harm your eyebrows but please avoid hot tubs, saunas, or swimming pools with chlorine during your healing time. Refrain from extreme & vigorous physical exercise for one week after your procedure. Going to the gym to workout is fine as long as you do not profusely sweat. Do not use any products with Glycolic, Hydroxy, or Fruit Acid soaps or lotions on the treated area.
- Do not use a tanning booth for the next week or so. The bulbs will fade the subtle colors involved in the application of your permanent cosmetic eyebrows.
- During the first week you may notice light to heavy color flaking and/or mild scabbing. The color will also begin to soften and fade. It is normal and to be expected to lose approximately 25-50% of the color during this time. A percentage of the color is in the outer layer of the skin (epidermis) and comes off within a week following your procedure. Some clients do not lose very much while others lose more. Everyone's skin is unique. Detail work, color strength, shape modifications and finishing touches are done during your second appointment.

Although it is permanent, your brow color will very slowly fade over time. You must do your part to ensure long lasting results. Use good health common sense.

If you have any problems or questions, please contact me. If you feel your brows are not healing properly or have become inflamed or irritated, please contact me. I feel I can best handle any initial inquiries you have.

Thank you for your trust and confidence. I sincerely hope you enjoy your permanent eyebrows for many years to come.
